The current condition of these features is unknown; however, they may survive as a ruin, earthworks or below ground archaeology. We advise that the historic environment features (labelled on the maps above and marked with a green polygon and or red dot) are protected from damage during forest operations, to comply with UKFS Forests and the historic environment guidance.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Heneb – The Trust for Welsh Archaeology, Heritage Management Dyfed region is informed and further information and advice can then be provided as required.
