DAT File No 14510

Thank you for your consultation. I have checked the map boundaries against the regional Historic Environment Record (HER) and other sources and note the following historic environment feature recorded within the consultation area;

PRN 35723 Iron Age Defended Enclosure SN18344964

This Iron Age Defended Enclosure has associated 'cropmarks' identified from aerial photographs which indicate archaeological remains lying just within this consultation area. A full description of the site can be found on the website Archwilio:

<https://www.archwilio.org.uk/arch/query/page.php?watprn=DAT35723&dbname=dat&tbnname=core&sessid=CHI21cjl8m&queryid=Q668387001585583041>

We do not consider the proposals for land-spreading of waste to have a detrimental impact on this feature, which exhibits no above-ground remains. However archaeological deposits may survive in this area, so ground intrusive activities should be avoided.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
