Thank you for your consultation. I have checked the map boundaries against the regional Historic Environment Record (HER) and other sources and there are no historic environment features recorded within the consultation area. One site which has been recorded is now believed to be a geological feature, therefore we have no concerns about these operations.

Primary Reference Number (PRN) 35712

NGR: SN1825650646

Site Type (preferred type first): Natural feature

Summary : Geophysical survey showed this site to be a natural feature.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
