DAT File No 14895

Thank you for your consultation. I have checked the map boundaries against the regional Historic Environment Record (HER) and other sources and note the following historic environment features recorded within the consultation area;

PRN 121927
PERIOD AND TYPE POST MEDIEVAL HOUSE
NGR SN23415051
SUMMARY

A small house called Ty-newydd is shown on the 1st edition OS map (1890), but is no longer shown on the 2nd edition (1905).

A Pyper 2020.

PRN 52061
PERIOD AND TYPE IRON AGE DEFENDED ENCLOSURE
NGR SN20755131
SUMMARY

A small cropmark enclosure lies on gentle northwest-facing coastal slope at 120m above sea level, with views over Cardigan Bay to the north. It is a cropmark site with no earthwork or other surface evidence. It is sub-rectangular in shape, approximately 40m northwest - southeast and 30m southwest - northeast, and defined by a cropmark ditch. The southwest side lies under a hedge-bank. There is no obvious entrance. In 2005, the site was under improved pasture. K Murphy 15 November 2005

PRN 35714

PERIOD AND SITE TYPE IRON AGE DEFENDED ENCLOSURE

NGR SN18244925

SUMMARY

This is a cropmark enclosure with no earthwork or other surface evidence. The site lies on a gentle west-facing slope, towards the head of a small valley, at approximately 90m above sea level. To the west the land falls away by 5m - 10m to a stream in the valley floor. The slope is undulating, and the southern side of the site occupies a small subsidiary valley or hollow a few metres deep. The site is overlooked from most sides. Aerial photographs show a curving arc of a cropmark ditch defining the eastern and southeastern sides of an enclosure, with a possible concentric ditch inside on the southeast side and splodges outside the ditch possible marking the site of pits. However, much of the field is marked by unresponsive vegetation which masks the site.

In 2005, a geophysical survey detected the curving line of ditch visible on aerial photographs with a entrance mid-way along its eastern side. The northern corner of this ditch turns a sharp right angle to the west, the southern corner is a gentle curve. Within the ditch a second (concentric) ditch springs from its northern side. This, too, has an entrance in its east side. Its south corner turns a sharp right angle to the west. This then is a bivallate enclosure, possibly of two phases, sub-rectangular in plan, approximately 60m by 60m.

The site is under improved pasture. K Murphy 26 January 2006

Having assessed the application, the proposals for land-spreading of waste should not have a detrimental impact on these features, which do not exhibit above-ground remains. However there may be archaeological deposits surviving below ground in those areas within the orange boundaries shown in the maps above, and we would recommend that these locations are not suitable for ground intrusive activities.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.

Yours sincerely
Alice Pyper

Subject: PAN-012213 Request for comments on deployment application

Dear consultee,

Request for comments on deployment application

Waste reg team: wasteregulation.swwales@cyfoethnaturiolcymru.gov.uk

Environment team: CeredigionEnvironmentTeam@cyfoethnaturiolcymru.gov.uk

NLO: Malcolm.Dines@cyfoethnaturiolcymru.gov.uk
Archaeological trust: a.pyper@dyfedarchaeology.org.uk

Deployment Reference Number:	PAN-012213
Permit Reference Number:	EPR-AB3891CX
Permit Holder:	Stepside Agri
Site address:	Rhosygadair Fach, Tremain, Cardigan, Ceredigion, SA43 1RP
Grid reference:	SN 23253 50212

We are consulting you as we have received an application for a mobile plant deployment.

For Natural Resources Wales consultees:

You have been consulted because you are the named contact for the permit (NLO), or area where the activity is occurring (Waste Regulation and NRM teams). If this is incorrect please let us know as soon as possible. Please complete the comments record (which has been saved in the below DMS folder) within ten working days of this email, i.e. **by 09/12/2020**. Please ensure the record is completed by all **relevant** officers who wish to make comments. Guidance on the comments we require can be found on the comment record.

DMS folder: [<hyperlink>](#)

For Environment Agency consultees:

We are consulting you as we have received an application for a mobile plant deployment for the permit that you regulate. You have been consulted because you are the named contact for the permit, if this is incorrect please let us know as soon as possible.

You can see the application documents attached

Please submit your comments by return email within ten working days i.e. **by 09/12/2020**

For archaeological trust consultees:

We are consulting you as per the terms of our working together agreement with you.

You can see the application documents attached

Please submit your comments by return email within ten working days i.e. **by 09/12/2020**

Kind regards

Natural Resources Wales Waste Permitting Team
