Dear Lynn,

FLA 15 20-21 Hean Castle Estate Compartments 2a & 3a

Thank you for your consultation. I have checked the map boundaries against the regional Historic Environment Record (HER) and other sources and note the following historic environment features recorded within the consultation area:

PRN: 106118

SITE TYPE: MINE SHAFT; COAL WORKINGS

NGR: SN1325806358

DESCRIPTION:

Marked as 'Old Shaft' on the 1921 Geological Survey map. Current condition is unknown. A.Day. March 2015.

PRN: 118196

SITE TYPE: SPOIL HEAP

NGR: SN1325806358

DESCRIPTION:

A mound approximately 17m across is depicted on the 1st edition OS map (1889). Given the coal mining remains in the area it is likely that this might be a spoil heap.

This mound is depicted in what then is shown as marshy ground. Since then the area has been planted with conifer trees. A Pyper 2020

1st edition Ordnance Survey 1889 Pembs. Sheet 35.15, 25"

We recommend that forest operations should avoid damaging the remnants of the coal workings which may survive as earthworks in the woodland.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
