We have no information on the current condition of this feature, which may survive as a ruinous structure and associated features, earthworks, or as below ground deposits.

We recommend that this feature and any associated structures should be protected from damage during forestry operations.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
