We have no information on the condition of these historic features; they may survive as ruinous structures, earthworks, or as only below ground remains. We therefore recommend that the areas identified on the map above as green polygons should be treated as archaeologically sensitive, and should be protected from potentially damaging forestry operations.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
