Pencannerybêl	SH 40012 40372	• Installation of new cassette style pass	Rural site located adjacent to woodland surrounded to the east by agricultural fields. The site is located approximately 150m west of Perysau Ln. There is no public right of way in close vicinity to the site.	Agree working hours, noise mitigation, traffic management and air quality management with Gwynedd County Council as appropriate.	The site is surrounded to the east by agricultural fields. The scheme is unlikely to result in a loss of agricultural land. Utilities running across site should be considered.	Check site for presence of utility services.	There are no Special Areas of Conservation (SAC), Special Protection Areas (SPA) or Ramsar located within 5km of the site. There are no Sites of Special Scientific Interest (SSSI) within 5km of the site. The site is located adjacent to the N. Bryn Llangadwalld Site of Importance for Nature Conservation (SINIC). The site falls within the an area of Restored Ancient Woodland. Potential for presence of protected species. Vegetation clearance must not take place during bird nesting season (March – August). Other seasonal constraints may apply.	There are no Geological Conservation Review Sites, Regionally important Geological Sites (RIGS) or geological SSSIs within the area, or historic or existing landfill sites present.	If excavation is required, consult with the Geoscience team within NRW (Trydan Jarrell) regarding the sensitivity of the area geologically, the potential for contaminated land to be present and the material handling procedures to be followed.	The area is not within a Groundwater Source Protection Zone but it is within a 'High' Groundwater Vulnerability Zone. The site falls within the Afon Erch.	Ensure best practice pollution prevention methods following EA PPGs and CIRA guidance. Undertake WFD Preliminary Screening The scheme would require a Flood Risk Activity Permit. Contact Natural Resource Management Team for site to agree construction details and working methods.	There are no Listed Buildings, Scheduled Monument, Conservation Area, Registered Parks and Garden or World Heritage Sites within the vicinity of the site. There are no Historic Environment Records or National Monument Records for Wales within close vicinity to the site. The site does not sit within/adjacent to a National Park, Area of Outstanding Natural Beauty or Historic Landscape.	Consult with Gwynedd Archaeological Trust over sensitivity of the area.	Once the proposed design is confirmed, consult with local planning authority, if it is determined that planning is not required, NRW must advertise the works (for further information/templates please contact Environmental Assessment Team)	Consultation with Gwynedd Council Planning Department regarding the planning considerations of the scheme.	• Flood Risk Activity Permit • WFD Preliminary Assessment	Works within Ancient Woodland and SINIC. Consult with Gwynedd Council Ecologist FRAP – will be required for permanent and temporary works. WFD – Consult with Natural Resource Management Team	Limited opportunity	Consult with local Natural Resource Management Team to identify any opportunities.	The Environmental Assessment Team (EAT) have determined that the works do not constitute high environmental risk and therefore do not require Environmental Assessment Team involvement. However, there is potential for environmental effects to occur if good working practices and appropriate consents are not obtained. The project Manager is responsible for ensuring that actions noted within this document are taken forward.
Dol y Bont	SN 63464 58804	• Installation of new cassette style pass	Rural site located within the northern extent of the Riverside Caravan And Camping Park, with a small number of caravans in close vicinity. There is no public right of way in close vicinity to the site.	Agree working hours, noise mitigation, traffic management and air quality management with Ceredigion County Council as appropriate.	The site falls within the Riverside Caravan And Camping Park. The scheme is unlikely to result in a loss of agricultural land. Utilities running across site should be considered.	Check site for presence of utility services.	There are no Special Areas of Conservation (SAC), Special Protection Areas (SPA) or Ramsar located within 2km of the site. There are no Sites of Special Scientific Interest (SSSI) within 5km of the site. The site is located adjacent to an area of Restored Ancient Woodland. Potential for presence of protected species. Vegetation clearance must not take place during bird nesting season (March – August). Other seasonal constraints may apply.	There are no Geological Conservation Review Sites, Regionally important Geological Sites (RIGS) or geological SSSIs within the area, or historic or existing landfill sites present.	If excavation is required, consult with the Geoscience team within NRW (Trydan Jarrell) regarding the sensitivity of the area geologically, the potential for contaminated land to be present and the material handling procedures to be followed.	The area is not within a Groundwater Source Protection Zone but it is within a 'High' Groundwater Vulnerability Zone. The site falls within the Afon Lari.	Ensure best practice pollution prevention methods following EA PPGs and CIRA guidance. Undertake WFD Preliminary Screening The scheme would require a Flood Risk Activity Permit. Contact Natural Resource Management Team for site to agree construction details and working methods.	There are no Listed Buildings, Scheduled Monument, Conservation Area, Registered Parks and Garden or World Heritage Sites within the vicinity of the site. There are no Historic Environment Records or National Monument Records for Wales within close vicinity to the site. The site does not sit within/adjacent to a National Park, Area of Outstanding Natural Beauty or Historic Landscape.	Consult with Dyfed Archaeological Trust over sensitivity of the area.	Once the proposed design is confirmed, consult with local planning authority, if it is determined that planning is not required, NRW must advertise the works (for further information/templates please contact Environmental Assessment Team)	Consultation with Ceredigion County Council Planning Department regarding the planning considerations of the scheme.	• Flood Risk Activity Permit • WFD Preliminary Assessment	Works within Ancient Woodland – Consult with Ceredigion County Council Ecologist FRAP – will be required for permanent and temporary works.
