Scale: 1:5,500

Ty Coed

Id, Species, Comments

- 1, DF, Unthinned, slight self-thinned modest volume pure DF.
- 2, DF/SS, Found to be a DF/SS mix, unthinned some slight self-thin.
- 3, JL, Unthinned, badly infected with phytophthora. Very dead stems not measured.
- 4, DF, Unthinned, rather disappointing volume for such a good site type. Also, a few butt sweep and odd SS mixed in.
- 5, SS, Narrow band of unthinned good volume SS at the foot of slope. Clearfell and replant with MB next to the bog?
- 6, SS, Unthinned, quite modest volume for such a site type.
- 7, NS, Former NS/Poplar row mix. Almost all Poplar is dead resulting in some good NS dbh mixed in.
- 8, NF, Very poor NF with MB mixed in.
- 9, MB, Low grade MB areas.
- 10, CAR/HAW, Planted CAR but poor with much HAW scrub mixed in.
