The current condition of some of these features is unknown; however they may survive as ruins, earthworks or below ground archaeology. Felling operations should avoid causing damage in these areas.

We would recommend that Cadw is consulted on those areas which lie within the Registered II* Parkland and Essential Setting of Golden Grove. We would welcome opportunities to see more of the historic parkland of Golden Grove to be restored through sympathetic felling / restocking. In the meantime however care should be taken during forestry operations not to degrade any surviving historic parkland features particularly boundary walls, earthworks or other structures.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can then be provided as required.
