Regulation 14, Section 42 of the Flood & Water Management Act 2010 - Transfer of private sewer and lateral drainage to Welsh Water - Scheme proposals may be subject to Welsh Water agreements / legislation. It is the responsibility of the client/contractor to ensure Welsh Water are consulted prior to commencement of works. Further information is available at www.dwr.cymru.com or rmbseag@dwrcymru.com

New dwelling - Automatic fire suppression system to be designed and installed in accordance with BS 9251: 2014 or equivalent technical standard.

The components of the automatic fire suppression system should be in accordance with BS 9252: 2011 or an equivalent technical standard.

Where an automatic fire suppression system is installed, an installation and commissioning certificate will be provided.

Confirmation of consultation with Dwr Cymru/Welsh Water to be provided confirming:

a) Where town mains are to be used, the designer must consult with the Water Undertaker to establish the typical operating water pressure range and flow capacities available.

b) Where town mains are to be used restrictions such as water meters shall not reduce the pressure and flow available below the performance specification detailed in the relevant technical standard.

c) Ancillary areas (such as car port, car park, garage etc ...) which are normally unoccupied do not require an automatic fire suppression system if they are suitably fire separated from the residential areas (see Appendix A, Tables A1 & A2). The minimum acceptable separation is 30 minutes integrity, insulation and stability.
