

General Information

Functionality

Archwilio has been designed to work via a web browser. Supported browsers are:

Firefox 3+
Chrome 3+
Safari 3+
Opera 9+
MS Internet Explorer 7,8
Flock 2+
Konqueror 3+
Netscape 9+

If you are having difficulty viewing the pages or content of *Archwilio* you may need to upgrade or change your browser to one of the above.

Advanced Search

The Advanced Search option is not currently enabled.

Record types

Records in the *Archwilio* database fall into two main categories:

1. Core records; archaeological and historical records relating to sites, monuments or findspots, such as castles, burial sites, chapels or flint tools.
2. Event records; detailing what are known as archaeological events, such as excavations, field surveys or other investigations.

Event records are distinguished from Core records with an **E** in the record *Name* column.
